

# Keep Energy Savings Growing

Since 2009, Xcel Energy has exceeded their energy savings goals every year and under spent their budget every year except 2012. Now they are proposing to scale back their energy savings goals for the next five years by a third. Xcel's goals should keep growing not shrinking.

**Xcel Energy's Actual Savings 2009-2014 and Proposed Goals 2015-2020**

**The Public Utilities Commission will be deciding this spring** whether to allow Xcel to scale back. Join us in showing broad public support to ensure Xcel does not roll back its energy savings programs.
